Project Design Phase
Problem – Solution Fit Template

Date	08 April 2026
Team ID	SWTID-2026-8559
Project Name	Enforcing Mandatory Fields Using UI Policies and Migra ng Changes with Update Sets
Maximum Marks	2 Marks

Problem – Solution Fit Template:

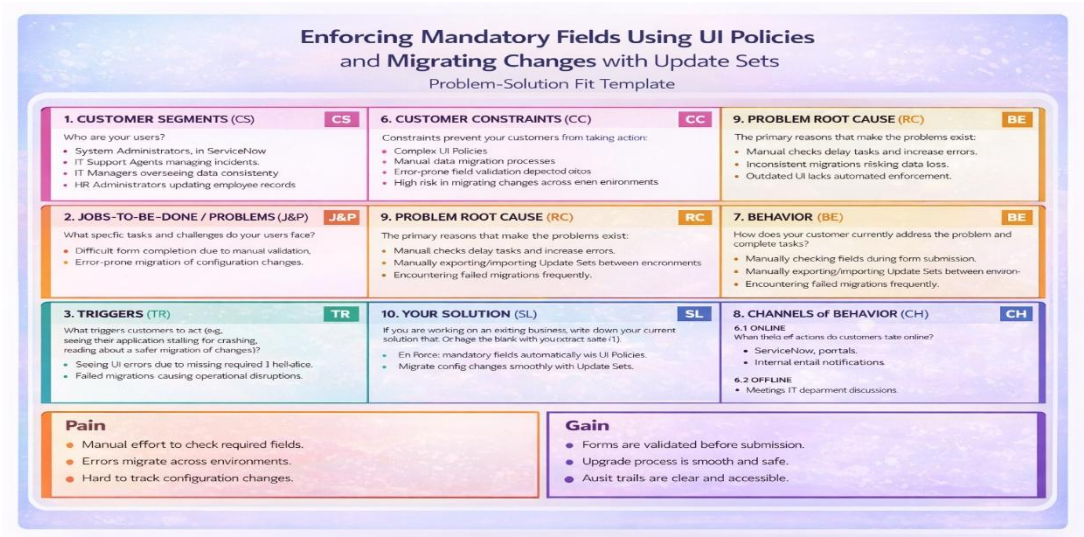
The **Problem–Solution Fit** in this project focuses on identifying challenges faced by users in managing form validations and migrating system configurations within ServiceNow, and providing an effective solution using **UI Policies and Update Sets**.

This ensures that the proposed system directly addresses real-world issues such as missing mandatory fields, manual validation effort, and migration errors.

Purpose:

- **Solve form validation issues efficiently**
  Ensure that mandatory fields are automatically enforced using UI Policies, eliminating manual checking and reducing user errors.
- **Enable safe and reliable migration**
  Use Update Sets to migrate configuration changes across environments without conflicts or data loss.
- **Improve system usability and user experience**
  Provide dynamic form behavior (mandatory, read-only, visibility) to guide users during data entry.
- **Reduce errors and operational risks**
  Prevent incomplete submissions and minimize migration failures through controlled processes.
- **Enhance system transparency and tracking**
  Track configuration changes and maintain proper version control using Update Sets.
- **Understand and improve the current workflow**
  Analyze existing manual processes and improve them with automation and structured deployment mechanisms.

Template:



Enforcing Mandatory Fields Using UI Policies
and Migrating Changes with Update Sets
Problem-Solution Fit Template
1. CUSTOMER SEGMENTS (CS)
CS
Who are your users?
System Administrators, in ServiceNow
IT Support Agents managing incidents.
IT Managers overseeing data consistenty
HR Administrators updating employee records
6. CUSTOMER CONSTRAINTS (CC)
CC
Constraints prevent your customers from taking action:
Complex UI Policies
Manual data migration processes
Error-prone field validation depectod oitos
High risk in migrating changes across enen enironments
9. PROBLEM ROOT CAUSE (RC)
BE
The primary reasons that make the problems exist:
Manual checks delay tasks and increase errors.
Inconsistent migrations risking data loss.
Outdated UI lacks automated enforcement.
2. JOBS-TO-BE-DONE / PROBLEMS (J&P)
J&P
What specfic tasks and challenges do your users face?
Difficult form completion due to manual validation,
Error-prone migration of configuration changes.
9. PROBLEM ROOT CAUSE (RC)
RC
The primary reasons that make the problems exist:
Manuall checks delay tasks and increase errors.
Manually exporting/importing Update Sets between encronments
Encountering failed migrations frequently.
7. BEHAVIOR (BE)
BE
How does your customer currently address the problem and complete tasks?
Manually checking fields during form submission.
Manually exporting/importing Update Sets between environ-
Encountering failed migrations frequently.
3. TRIGGERS (TR)
TR
What triggers customers to act (e.g.,
seeing their application stalling for crashing,
reading about a safer migration of changes)?
Seeing UI errors due to missing required 1 hell-afice.
Failed migrations causing operational disruptions.
10. YOUR SOLUTION (SL)
SL
If you are working on an exiting business, write down your current solution that. Or hage the blank with yourxtract satte i1).
En Force: mandatory fields automatically wis UI Policies.
Migrate config changes smoothly with Update Sets.
8. CHANNELS of BEHAVIOR (CH)
CH
6.1 ONLINE
When theis ef actions do customers tate online?
ServiceNow, portals.
Internal entail notifications.
6.2 OFFLINE
Meetings IT deparment discussions.
Pain
Manual effort to check required fields.
Errors migrate across environments.
Hard to track configuration changes.
Gain
Forms are validated before submission.
Upgrade process is smooth and safe.
Ausit trails are clear and accessible.
